MICROSERVICES ROADMAP

Section	Topic
1	**Microservices Fundamentals**
	What Are Microservices?
	Monolith vs Microservices
	Microservices Architecture Explained
2	**Building First Microservice**
	Creating & Running Multiple Services Locally
3	**Inter-Service Communication**
	Microservices Communication Patterns
	REST Communication Between Microservices
	Feign Client & Implementation
	Handling Timeouts and Retries
	Circuit Breaker Pattern
	Rate Limiters
4	**Service Discovery**
	What is Service Discovery? Implementing Service Discovery
	Registering Services Automatically
	Client Side Load Balancing
5	**Centralized Configuration**
	Problem with Configuration in Microservices
	Implementing Centralized Config
	Dynamic Configuration Refresh
6	**API Gateway**

	Why Microservices Need an API Gateway
7	**Logging and Monitoring**
	Centralized Logging for Microservices
	Distributed Tracing
	Monitoring Microservices Metrics Visualizing Metrics Dashboards
8	**Event Driven Microservices**
	Event Driven Architecture Explained
	Messaging Systems for Microservices
	Producing and Consuming Events
	Kafka & Rabbitmq
9	**Microservices Security**
	JWT/OAuth
	Gateway Based Authentication
10	**Containerization**
	Docker Containers
11	**Deploy Microservices**
	Deploy microservices to cloud
